International exhibition on cold chain, logistics & warehousing for food, drink and fruits & vegetables industry

September 22 - 24, 2016
Hall 5, Bombay Exhibition Centre
Mumbai, India
An Overview

- The Indian food industry stood at around US$ 40 billion in 2014 and is expected to touch US$ 64 billion by 2018
- India is the largest producer of pulses, milk, tea, cashew, mangoes and buffalo meat; and the 2nd largest producer of tea, wheat, sugarcane and rice in the world
- Food processing industry in India is ranked 5th in terms of production, consumption, export and expected growth
- Meat, fish, fruits, vegetables and oils segment account for over 40% of the food processing industry
- Foreign Direct Investment (FDI) is permissible for all the processed food products on automatic route except for items reserved for MSMEs
- Despite the large production of food - food inflation, post harvest wastage and food security issues are major concerns for policy makers in India

Need for efficient food logistics systems:

- 11% of world’s total vegetable production is accounted by India alone but India’s share in global vegetable trade is only 1.7%
- The domestic Dairy Industry is expected to touch milk output of 190 million tonnes & a turnover of US$ 100 Billion by 2016
- Around 25% of fish produce is wasted annually in India
- Around 25,000 unregistered slaughter houses are present in India, which generally lack chilling facilities
- With the current capacities only around 11% of what is produced can be stored
- Key growth drivers include - growth in organized retail and food service industry, government initiatives, rising export demand for Indian processed and frozen food

Indian Food Logistics Market – an overview

Over the last two decades, the Indian food sector and its associated supply chain has been witnessing a rapid transformation. Modern retail sales are growing at 49% per year based on a rapid penetration in the urban food markets and a growing rural market. This has resulted in a growth of food logistics, distribution, and wholesale companies in India. Policies that enable and provide encouragement to the sector to invest further, will decide the future of food logistics.

The shift towards the use of modern logistics is helping food retailers cut transaction costs, increase consistency of quality, and meet global safety standards and regulations. Some of the modern logistics companies have started backward integration of their services to big retailers.

India’s integrated cold chain industry - a combination of surface storage and refrigerated transport - has been growing at a CAGR of 20 percent for the last three years. The cold chain market in India is anticipated to reach US$ 10 Billion by 2017.

Warehousing, which forms 20% of the total logistics market is expected to grow at a rate of 35 to 40% annually, displaying high potential for growth over the next few years.

Special focus by Govt. of India

Establishment of National Centre for Cold Chain Development (NCCD), fiscal incentives for investment in cold chain systems like concessional custom duty at 5%, exemption of excise duty on refrigeration machinery, 100% tax holiday for the first 5 years, financial aid up to 50% on purchase of plant and machinery of cold chain system, etc., outlays the emphasis given to this sector by the Government of India.

Why to participate?

- Concurrent to India’s leading exhibitions for food and drink industry, International FoodTec India & Annapoorna – World of Food India
- With these leading trade fairs as concurrent shows, Food Logistics India has a ready audience of over 14000 target industry trade visitors
- Well attended by Indian as well as International exhibitors and trade visitors
- All the stake holders from suppliers to manufacturers to distributors / retailers from the food & drink industry are present
Book your success...

Food Logistics India 2016 in brief

Date  September 22-24, 2016
Venue   Hall No.5, Bombay Exhibition Centre,
         Opp. Mahananda Dairy, Western Express Highway,
         Goregaon (E), Mumbai-400063, India
Schedule  Assembling  :  September 19-21, 2016
         Show  :  September 22-24, 2016
         Dismantling  :  September 24, 2016 (from 4 p.m.)
Admission  Trade and business visitors only
Exhibitor Profile  Cold Chain Service Providers
         Material Handling
         Reefer Transportation and Logistics
         Storage Solution
         Refrigeration Technology
         Pre Fab and Warehousing services
         HVAC and Refrigeration
         Cold Rooms and Storage
         Compressors and Condenser
         Conveyers and Conveying Systems
         Freezers and Cooling Technology
         Roofing and Flooring Solutions
         Climate Control Technology
         Food Park and SEZ
         Humidification and Dehumidification Systems
         Doors and Dock
         Cargo services and Freight Forwarders
         Infrastructure services
         Cooling towers and Systems
         Insulation Materials
         Testing and Quality Measuring Equipment
         Consultants
         Automation and Robotics
         Others
